

## SRI LANKA: Bird List

'We started with morning birding in the hotel garden near the airport, where we could see most of the common garden birds. After lunch we proceeded to Kitulgala, where we spent two nights. The rainforest across the river there is very good for lowland endemics. We had superb views of most of them including Green-billed Coucal, a male Serendib Scops Owl at its day roost, Chestnut-backed Owlet in daytime, Crimson-backed Flameback, Sri Lanka Magpie and Spot-winged Thrush; also an Indian Pitta.

Our next destination was Ratnapura, from where we visited the Sinharaja rainforest on two days. In this forest we could complete all the remaining lowland endemics, including superb views of Sri Lanka Junglefowl, three Sri Lanka Spurfowl walking across the road, three Red-faced Malkohas, a pair of Ceylon Scaly Thrush, a flock of White-faced Starlings and a flock of Ashy-headed Laughing-Thrushes. We also had superb views of Malabar Trogons, and a male Sri Lanka Frogmouth sitting on a nest.

After three nights in Ratnapura, we went on to the dry country including the south-eastern coast. We had jeep drives in three National Parks, namely Udawalawe, Bundala and Yala. We also spent time exploring tanks (man-made reservoirs), lakes, lagoons, marshes, slat-pans and mud flats, looking for waterbirds and shorebirds. In these areas, we had superb views of Spot-billed Pelican, Yellow Bittern, Black Bittern, Watercock, Pheasant-tailed Jacana, Indian Thick-knee, Great Thick-knee, Small Pratincole, Grey-bellied Cuckoo, Blue-faced Malkoha, Indian Scops Owl, Malabar Pied Hornbill, White-naped Woodpecker, Brahminy Starling, etc.

Next, we spent two nights at Nuwara Eliya in the high hills, and made a half-day visit to Horton Plains National Park. Here we had superb views of a courting pair of Sri Lanka Whistling Thrush and a couple of Sri Lanka Bush Warblers. In Nuwara Eliya and Horton Plains we 'cleaned up' all the hill endemics. We also had wonderful views of other specialities such as Pied Thrush and Kashmir Flycatcher.

We then climbed down to Kandy, where we visited the Udawattakele forest and had superb views of Brown Fish Owl and other wet-zone forest birds. After a night in Kandy, our next destination was Polonnaruwa, an ancient capital in north-central dry zone. En route we made a brief visit to a forest in Sigiriya where we saw several dry-forest birds. After a night in Polonnaruwa, the next day we visited the ancient ruins there, and then returned to our hotel near the airport.

By end of the tour we had encountered all the Sri Lanka endemics, most of the other Indian Subcontinent endemics, and many other Asian birds, totalling up to 224 species.' Deepal Warakagoda.

**BIRD LIST:** This is a list of all the species seen during our tours to Sri Lanka.

Column A = Number of tours on which this species has been recorded.

Column B = Number of days this species was seen on the last tour.

Column C = Maximum daily count for this species on the last tour.

H = Heard only

(H) = Species seen, but most birds only heard

**E** = Endemic

**Essp.** = Endemic subspecies
