

ARGENTINA

“Some trips have one bird or experience that eclipses all others. But others seem to offer one highlight after another. Such was the case with this tour. Two Horned Coots found on a high Andean lake and a pair of White-bellied Seedsnipe, first calling, then flying in and landing closer and closer until finally they were within easy viewing distance vied for two of the best sightings of the trip. The scream ‘there it is’ will linger in our minds for a long-time to come and a viewing of Garganta del Diablo at Iguazú falls under an almost full moon may well have been the experience of the tour. But, back to the beginning....

Our very early first morning flight to Salta gave us extra time to bird the bird-rich area near our hotel. Cream-backed Woodpecker, White-tipped Plantcutter and Red-legged Seriema followed by Common Potoo, Tropical Screech Owl and Scissor-tailed Nightjar on our night excursion set a positive omen to an exciting week in the Northwest. Each stop on our journey toward San Martin had us enjoying a new subset of birds – waterbirds at local reservoirs, a pair of Spot-backed Puffbirds, and a selection of small passerines. Our day in the higher part of Calilegua National Park tested our skills to sight birds through dense fog and rain. This challenging weather, however, probably benefited us with incredible views of both Stripe-headed and Fulvous-headed Brush-Finches feeding along the roadside, a Barred Forest-Falcon that perched for all to see, Blue-crowned Trogon, Rufous Casiornis and Black-capped Antwrens as we kept descending to lower altitudes in search of better birding weather. Our second day in the park, having already seen many of the lower park species, allowed us to ascend to higher altitudes where we soon enjoyed close views of a White-throated Antpitta, followed by a pair of Giant Antshrikes and other species missed the previous day.

The family of Torrent Ducks and a nesting Rufous-throated Dipper provided a most enjoyable afternoon of birding the Yala Valley while a male Lyre-tailed Nightjar caught in the beam of the spotlight was magic once darkness fell in the valley. Red-faced Guans made a brief appearance the following morning before we began our ascent of the Argentine Andes. Gray-hooded and Mountain Parakeets, Giant Hummingbirds, Red-tailed Comets and the scenery of the Andes captivated us during our drive to Abra Pampa. Our late afternoon stop at Lago Huancar was filled with new species as we sighted Giant Coots, Puna and Chilean flamingos, Puna Ibis, Andean Geese, Andean Avocet and then the ultimate prize, a pair of Horned Coots. The pink hues of 3 species of flamingos provided a stunning backdrop while scanning the high-altitude lakes including Pozuelos. During our day-long trip to Pozuelos, some species, including Vicuñas, were easy, while others, especially Puna Rheas required a bit more work. As we descended toward Jujuy for our flight to Buenos Aires, we found the breathing a bit easier and were sated with the birds, culture, and beauty of this less visited area of the country.

Our time birding in and around Buenos Aires and to the south of the city where we immersed ourselves into the habitat of the Pampas offered birding for all interest levels – gulls, terns, waders, new families and incredible numbers of birds. Olrog’s Gulls, Greater Rheas, Southern Screamers, Spotted Tinamous were just a few of the ‘most wanted’ that were soon sighted during our time birding around San Clemente. Many-colored Rush-Tyrant charmed us all as did the diminutive Bay-capped Wren-Spinetail that had a way of disappearing before you could say its name.

The Valdés Peninsula will be remembered for the mammal and bird diversity including our boat trip with Southern Right Whales in the late afternoon, our day-long drive with sea lions, elephant seals and our multiple sightings of Elegant Crested Tinamous, proving that this is not a mythical bird family. Most of us will always associate the Valdez with the scream ‘there it is!’ as a Snowy Sheathbill floated ethereally in front of Bernie then disappeared, never to be seen again that day or on the entire trip. Our time in El Calafate had us experiencing the winds of Patagonia first-hand. Fortunately, Magellanic Plover was seen in the stillness of the first afternoon. But, the following day, holding our binoculars steady enough to see the field features on a Spectacled Duck was a challenge but we did manage it, not only for the duck but for the other sought-after species including Rufous-tailed Plantcutter, Magellanic Woodpecker, Chilean Flicker, Chilean Blackbird, and a very confiding Magellanic Tapaculo.

ARGENTINA: Bird List...2

The beauty of Tierra del Fuego has to be experienced. No superlatives can describe the beauty of the city of Ushuaia with the snow-capped Andes as a backdrop and the Beagle Channel leading to the South Atlantic bordered on each side by southern beech forests. Kelp Geese, Chilean Skuas, Gentoo and Magellanic Penguins, a second sighting of Magellanic Woodpecker were just a few of the birds enjoyed during our stay on the island. And, the cherry for those who did the climb toward the Martial Glacier was the incredible views of a pair of White-bellied Seedsnipe, only the second time this species has been seen on a Sunbird tour. Austral Canastero, Rufous-breasted and Tawny-throated Dotterals were some of our final sightings around Rio Grande before we flew back to Buenos Aires.

For those who continued on to Iguazú Falls the birding continued to be enhanced by the setting. The Falls were flowing with more water than usual. Rufous Gnateaters, nesting Blond-crested Woodpeckers, a Rusty-breasted Nunlet, a Short-tailed Ant-thrush were just a few of the line-up of species that we encountered as we birded forest areas in and out of the park. Our afternoon walking the boardwalks of the falls left us in awe of the force of the waters tumbling in and around us at every look-out. The sightings of the rare Black-fronted Piping-Guan and of a nesting Green Ibis also made this walk a successful birding excursion. Confiding and entertaining Brown Capuchin monkeys drew our attention away from the birds with each encounter on forest trails. Our visit to Garganta del Diablo on a moon-lit night provided an incredible ending to a superb trip to Argentina. Thank you all for joining me and making my last Sunbird tour such an enjoyable one.” – *Judy Davis*
