

## BRAZIL – The Pantanal and Mato Grosso Rainforest

‘An Agami Heron stealthily stalking prey, a pair of Red-Fan Parrots at eye-level high in the canopy, flights of macaws watched from above, a Tropical Screech Owl early one morn, a Great Potoo cryptically becoming one with a branch, a Band-tailed Antbird hopping at the river’s edge, Chapada Flycatchers singing from bush tops, a Helmeted Manakin elegantly portraying its red and black plumage, a Jabiru. . . . A South American Tapir frozen in a spotlight one night, Crab-eating Foxes actively hunting, Giant River Otters seemingly as curious about us as we were about them, a Giant Anteater disappearing in the forest more rapidly than the eye could follow. . . . Hosts that, in just a few hours, went from being strangers to being friends, *pousadas* and lodges that became second homes from the moment of our arrival, food that had us tossing willpower to the wind as we openly went for seconds. . . . The birds, mammals and experiences of Mato Grosso will take far longer to fade than the hours spent on our international flights or the months spent planning for our incredible journey to this diverse state of Brazil.

From the moment we left the city of Cuiabá, the vastness and diversity of the Pantanal revealed itself to us and did not end until we returned to the city a few days later. The brakes of the bus were in constant use as Southern Screamers were sighted in a field, Giant River Otters appeared unexpectedly in a flooded area, parrots were spotted landing in nearby trees and kingfishers and herons stood guard over each bridge. Each flooded pool appeared to have its own resident Snail Kite, Limpkin and a population of caiman. Our comfortable and welcoming lodge will always be equated with its flagship species, the Hyacinth Macaw, which was evident on the grounds at all hours of the day – but we will not soon forgot our host’s uncanny ability to show and teach us about the reptiles of the *fazenda*. Our walks along forest trails had us using auditory and scanning skills to spot a Great Potoo on a daytime roost, a Mato Grosso Antbird and many other small passerines. A leisurely boat trip provided a more relaxed but no less productive birding experience with guans, raptors, otters and nighthawks. Night drives always stimulate the senses and heighten expectations, and our decision to forego an extra hour’s sleep one night was rewarded with unparalleled views of tapir, Boat-billed Herons, Crab-eating Foxes, nightjars, a Great Potoo and thousands of red caiman eyes staring from the watery edges of the road. And always, our hosts greeted each return from explorations of the property with smiles, and the excellent food and service that combined with the incredible birding made it difficult to say farewell as we traveled to explore the southern Amazonian forest.

From the spotting of the first Helmeted Currawong along the river’s edge, Cristalino Lodge offered something new and exciting each day. Antbirds that dispelled myths that they are impossible to see by actually showing themselves, puffbirds, jacamars, macaws perched and in flight, manakins and other species all provided opportunities to become familiar with Neotropical bird families during our five-day stay. What is it that make a tropical forest lodge one of the quintessential experiences for a birder? Is it because birding commences the moment you step outside the door to your bungalow? Is it the boat trips along a tranquil river? Or is it the canopy tower, which allows a different perspective for viewing birds? Our experience at Cristalino would indicate that it is the combination of all these things and more, including the unexpected comfort of accommodation in such a remote setting, the diversity of food available (including the ever-present chocolate cake) no matter how early we wanted to begin birding each morning, and the quality of bird life no matter what means we chose to experience it – forest trails, boat trips or canopy tower! Whether standing still while a Banded Antbird circled us, enjoying the brilliance of a Spangled Cotinga or watching a pair of Red-fan Parrots at eye-level from high in the canopy, seeing a Sunbittern in flight, or self-inflicting whiplash to our necks as we tried to follow a Varzea Shiffornis as it flew back and forth in front of the boat, each hour provided new and exciting experiences. Five days allowed us to only touch the surface of this diverse ecosystem.

## BRAZIL - The Pantanal and Mato Grosso Rainforest: Bird List...2

The Chapada, our third ecosystem of the trip, gave us some welcome relief from the constant attention that tropical forest birding demands. We spent early mornings in the *cerrado* with open spaces and low trees and vegetation, while White-rumped and White-banded Tanagers and Chapada Flycatchers all made the expected appearances. As the heat of the open habitat descended upon us, we welcomed the opportunity to retreat into the shade of the forest and found the birds very cooperative. Our encounters with a male Band-tailed Manakin and Pavonine Cuckoo were a couple of the mega-highlights of our short time here. Sunset from our lodge grounds, with views of Blue-winged Macaws perched and in flight, rivaled the sunsets we experienced during our time in the Pantanal and at Cristalino. A Tropical Screech Owl in the pre-dawn darkness was most cooperative on our final morning, prior to taking in the scenic beauty of a Chapada sunrise from a lookout point. The outdoor dining area, a Brazilian barbeque, our comfortable rooms, our host rapidly becoming one of the group rather than a detached hotel owner. . . . All of these things – not to mention the excellent birding! – made it difficult to pack for our flights and an end to this incredibly diverse and bird-rich tour, which had merged three ecosystems into a birding experience not soon forgotten.' - *Judy Davis*

### BIRD LIST:

Column A = Number of tours on which this species has been recorded.

Column B = Number of days this species was seen on the last tour.

Column C = Maximum daily count for this species on the last tour.

H = Heard only, (H) = Mostly heard but some seen, N = Nest.
