

## VIETNAM

After gathering in Vietnam's capital city of Hanoi our first real birding took place at Van Long nature reserve where we took to the water in sampans in search of an extremely rare primate – Delacour's Langur, thought to number fewer than 250 and so our encounter with a dozen or so of these beautiful monkeys probably represented 5% of the world population. From the boats we also encountered a nice selection of waterbirds including six species of heron, White-browed Crake and White-throated and Common Kingfishers, while on a nearby paddy Pheasant-tailed Jacanas made exotic companions for the accompanying flock of Garganey.

This year's visit to Cuc Phuong National Park encountered some unfortunate weather and much of our time there was spent in cold misty conditions. However we still found some excellent birds during our visit including cute little Pied Falconets, cartoon-like Silver-breasted Broadbills, some nice flocks of Japanese Thrushes, a few less confiding White's Thrushes, skulking Limestone Wren-babblers, gorgeous Sultan Tits, and unexpected encounters with Little and Chestnut Buntings. Top billing however went to the stunning Bar-bellied Pittas that played hide-and-seek with us on the rainforest floor.

Next we moved on to Tam Dao, a village that appears to float high above the cloud. This former French hill station is situated 1000m up on one of the dramatic limestone hills erupting out of the Red River floodplain, and is home to many species found only in this area of Vietnam. During two full days of birding we explored the suite of habitats around the village and got to grips with the likes of Chestnut Bulbul, Rufous-headed Parrotbill, Silver-eared Mesia, Schaeffer's Fulvetta and Collared Babbler. Chuckling flocks of Grey Laughing-thrushes tormented us in the thick bushes all around but refused to show a feather – apart from a few on the side of the track which indicated that local hunting may well be a reason why the remaining birds are so shy. The weather had changed in our favour though and we enjoyed some lovely sunny walks accompanied by a wealth of local colourful butterflies.

Flying south to Dalat we quickly discovered that not all areas in Vietnam present such difficult birding and in the hillsides around this attractive ex-French hill station we encountered a wealth of birds including all the Dalat plateau endemics. The Ta Nung valley was especially productive and we returned here a number of times enjoying close views of beautiful Grey-crowned Crocias (the appropriately-chosen logo species for Richard's company Vietnam Birding), Orange-breasted Laughing-thrushes and Vietnamese Cutias. The montane coniferous forests yielded all the hoped-for species including Slender-billed Orioles, a pair of Red (or perhaps Vietnamese?) Crossbill, and lovely Vietnamese Greenfinches. We had to travel further afield to find Collared Laughing-thrush, but the drive was well worthwhile to see the extensive amounts of broad-leaved woodland preserved in Bi Doup-Nui Ba National Park as well as the bird itself. Finally a hike up the trail towards the peak of Lang Bian mountain produced nice views of Yellow-billed Nuthatch and Hume's Treecreeper and yet more Vietnamese Cutias.

Our final site was in the lowlands at Cat Tien National Park and as Richard had promised it was hot and humid – though perhaps not as bad as it might have been and it was only really the middle of the day that got steamy. Tropical lowland diversity was apparent right from the first and our bird list quickly grew with the addition of many widespread southeast Asian species as well as a number of more local specialities. Perhaps prize amongst these were the stunning Siamese Firebacks that we saw close to the vehicle on our very first morning. Green Peafowl are perhaps even fancier, but they were much shier and rather elusive – as was Germain's Peacock-Pheasant though we did all see at least one bird. Orange-breasted Trogons glowed in the forest greenery, while woodpeckers ranged from the small and cute Heart-spotted, through flashy Flamebacks to the outrageously extrovert Great Slaty, three of which put on a memorable display on our final afternoon. We enjoyed a number of sightings of Bar-bellied Pittas and their close cousins the colourful broadbills included Dusky, Black-and-red and Banded – a five-broadbill tour once again.

**BIRD LIST:**

Column A = Number of tours on which this species has been recorded.

Column B = Number of days this species was seen on the last tour.

Column C = Maximum daily count for this species on the last tour.

H = Heard only.

(H) = Mostly heard but not seen.
